Continuation of 10. Other (including any explanation in support of the above items):

This application was electronically received at the Board of Patent Appeals and Interferences on December 20, 2006. A review of the application has revealed that the application is not ready for docketing as an appeal. Accordingly, the application is herewith being returned to the examiner. The matter requiring attention prior to docketing is identified below.

The Appeal Brief filed January 20, 2006, is defective because the Summary of Claimed Subject Matter does not map the claimed invention to the independent claims as set forth in 37 CFR § 41.37 (c)(1)(v) which states:

(v) Summary of claimed subject matter. A concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

Accordingly, it is

ORDERED that the application is returned to the Examiner:

- 1) to hold the Appeal Brief of January 20, 2006 defective;
- 2) for the applicant to file a substitute Appeal Brief in compliance with 37 CFR § 41.37; 3) for the examiner to consider the substitute Appeal Brief and, if necessary, vacate the Examiner's Answer mailed March 2, 2006 and issue a revised Examiner's Answer; and 4) for such further action as may be appropriate. .
